## LamiGard™

Help is in Your Hands

For Horses With Conditions Associated With Laminitis\*

Don't Let This Happen

**“No Foot-No Horse”**

In acute cases ask your veterinarian about  
LamiGard™ Paste

### LamiGard™ Paste & Pellets

- Powerful antioxidants
- Natural plant extracts
- Supportive enzymes and vitamins

Works quickly and effectively to:

- Improve circulation
- Reduce inflammation and pain
- Scavenge Free Radicals
- Stabilize Cell Walls
- Improve Glucose Utilization

*"I am always very cautious about these types of products, but I have found LamiGard™ to be outstanding." Dr. David Platt BVSc, PhD, DEO, FRCVS, RCVS Diplomate in Equine Orthopaedic Surgery, Consultant Equine Surgeon.*

*I decided to try LamiGard after exhausting every other avenue (change of diet, acupuncture, supplements and herbs) for my daughters' pony who had chronic laminitis causing lameness over 4 years. After bouts of acute founder yearly I tried her on lamigard. Days later there was a marked improvement. After a couple of weeks she was sound. Within a year the laminitic rings on her hooves had decreased and she has been sound for 1 and a half years. I have been so impressed with LamiGard that I have my clients who are international level Grand Prix show jumpers using it. LamiGard has improved the horses quality of hoof, growth and general health of hoof even for horses without founder. Horses stay sounder longer. I would recommend LamiGard for any horse, especially horses used for competition." "An ounce of prevention is worth a pound of cure." Robbie Bongers*

\*Also excellent for use with pain and lameness resulting from any disease of or injury to the foot.

# LAMIGARD™ Rx Paste & LamiGard™ Pellets

**LAMIGARD™** was developed and is manufactured in the U.S. for use in horses and ponies prone to laminitis. It is available in two forms: an oral paste available to veterinarians and a maintenance oral pelleted supplement. Our approach to foot health involves a proprietary formulation providing strong antioxidants, essential and non-essential amino acids, vitamins and other plant origin extracts demonstrated to have beneficial effects on the horse's hoof.

**Some of the important ingredients in LAMIGARD™ include:**

- 1) DL-Methionine: Essential sulfur containing amino acid
- 2) L-Glutathione: Antioxidant tripeptide
- 3) Biotin: Water soluble B complex vitamin
- 4) Folic Acid: B9 or Folicin
- 5) D-Alpha Tocopherol: Antioxidant organic compound with Vitamin E activity
- 6) Herbal and other plant extracts

**Some of the positive effects of the components include the following:**

- 1) Strong anti-oxidant activity.
- 2) Improved circulation to the feet and decreased pulse pressure.
- 3) Decreased liver damage due to circulating toxins resulting from damage to the feet (and other tissues) greatly improving the body's ability to cope with toxic insult.
- 4) Sulfur provided to the body that is essential for the production of certain amino acids, hoof wall and connective tissue development.
- 5) Active anti-inflammatory/analgesic effects.
- 6) Protects cells from toxins such as free radicals and stabilizes cell walls.
- 7) Co-enzyme activity to combine with toxic substances for excretion via the kidneys.
- 8) Insulin production stimulated in the pancreas improving glucose utilization and decreasing hyperglycemia (particularly important in decompensated insulin resistant ponies and certain breeds of horses).
- 9) Decreased damage to arteries and reduced clot formation.
- 10) Enhanced immune function and modulation.
- 11) Increased resistance to physical, biologic and chemical stressors.

The information above provides a brief description of **LAMIGARD™**. Our goal is to safely and effectively aid in the maintenance of healthy feet during acute insult and provide supportive nutrients on a daily basis to horses with founder or a history of bouts of laminitis.

**LAMIGARD Rx Paste** is available as a highly concentrated paste formulation providing a 14 day program.

**LAMIGARD** oral pellets are packaged as a feed additive in a convenient 60 day supply.

Both contain the important ingredients shown above as well as other herbs and plant origin components.

**LAMIGARD™** has been recently introduced in the U.S. however it has been used successfully with excellent results in the UK and Europe.

*"A sport horse I am treating had such severe laminitis that we could not pick up his feet for x-rays to determine if sinking or rotation had occurred. After two weeks of treatment with LamiGard™ he had progressed to the point where we could take x-rays. We discovered he had sunk but he was able to be turned out in a small paddock and was walking without pain. Thank you for introducing me to Lamigard™." Jason L. Layfield, DVM*

*"We have a horse that was diagnosed with Potomac Horse Fever and hot feet and was sent to New Bolton. We also put him on LamiGard™Rx. The horse improved significantly and was returned to the farm in three days." Murmur Farm, Darlington, Maryland*
